

iPhone, iPad, & iPod Touch

Launch the Safari browser on Apple's iOS and navigate to the website or web page you want to add to your home screen. Tap the Share button on the browser's toolbar — that's the rectangle with an arrow pointing upward. It's on the bar at the top of the screen on an iPad, and on the bar at the bottom of the screen on an iPhone or iPod Touch. Tap the Add to Home Screen icon in the Share menu.

You'll be prompted to name the shortcut before tapping the Add button. The shortcut can be dragged around and placed anywhere, including in app folders — just like a normal app icon. (To create app folders on iOS, touch-and-drag an app's icon onto another app's icon and hold it there for a moment.) When you tap the icon, it will load the website in a normal tab inside the Safari browser app.

Other browsers, like Chrome for iOS, don't offer this feature. Due the limitations in Apple's iOS, [only Apple's own Safari browser is allowed to do this.](#)
